**1981 GRAY TABLE**

**\$380**

## DESCRIPTION

A celebration of pure geometry and colors, this side table features three methacrylate components in which graphic motifs and transparency overlap, creating a unique and harmonic piece of functional decor. The square top has a solid gray color and rests on a base that comprises two laser-cut legs with black diagonal stripes crossing in the center to give stability to the table, while creating a stunning optical effect. Inspired by the concept of free combination of patterns and color of the Memphis Milano collective of the '80s, this table is easy to assemble and extremely versatile.
