1981 TEAL SIDE TABLE

\$385

DESCRIPTION

Crafted of methacrylate, each of the three components of this eye-catching table displays a color and a geometric motif that overlap to create a harmonious visual effect. The solid teal top has a square shape with rounded corners and is inserted into the two crossed legs below in an easy-to-assemble system. Different geometric motifs - teal horizontal stripes and small black random lines - decorate the two legs. The perfect accent for a modern eclectic home, this table pays tribute to the design freedom expressed by the Milanese collective Memphis of the 1980s.
