Cassina

9 BY PIERO LISSONI - BLACK

\$1,350

DESCRIPTION

9 - Low table with marble top. Created by Piero Lissoni, these cylindrical and modular tables have been designed for the corporate or hospitality environments. Available in either standard or coffee-table heights, with round tops in various size options, these accessories evince a soft-spoken elegance, and come in a range of materials that chime beautifully with the finishes available on Cassina's other pieces. The simple lines, appropriate to many settings, are set off by the quality of the materials used. These include solid ashwood and american walnut, and various types of marble. The glass tops, meanwhile, also come in numerous colour options. The dining versions are also available with laminated top.
