Covi e Puccioni

AFRODITE LIGHT BLUE SCNCE

\$840

DESCRIPTION

This splendid sconce owes its name to the reputation of alabaster - here employed as back support for the Murano glass diffuser - which was regarded as the "stone of gods" in antiquity. Attached to the wall by means of a glossy metal mount, the shade in Murano glass with a twisted optic texture diffuses the light produced by the G9 LED bulb housed within. The glass is available in other four delicate color combinations, please check available options with the Concierge.
