ALDEBARAN FRUIT BOWL BY ETTORE SOTTASS

\$4,780

DESCRIPTION

This striking fruit bowl was designed in 1983 by Ettore Sottsass. The tapering cylindrical silhouette made of glass features three handles and a transparent body decorated with yellow vertical lines, exquisitely rendering the soft consistency of fabric. Versatile and unique, this stunning object of functional decor can be showcased on a table as a centerpiece or on a mantelpiece as sculptural decoration. Both dimensions and colors might slightly vary because of the handcrafting nature of its production.
