Giuliano Tincani

AMMONITE BLACK SCULPTURE

\$1,650

DESCRIPTION

With its earth tones nuances, this magnificent piece features an ammonite fossil cut in half to reveal its inner structure, placed on a minimalist brass base with a polished silver finish. Appreciated for their spectacular ornamental displays, this polished ammonite fossil from Madagascar will make a statement as just a stand alone display. The way the ammonite fossil was worked allows for both its suture pattern and internal chambers to be seen at the same time.
