AMMONITE CANDLESTICK

\$920

DESCRIPTION

Modern and ancient merge in this timeless candlestick that will add a glamorous accent on a mantelpiece or console in a living room, dining room, or entryway. The essential lines of the polished nickel-plated brass frame create the perfect setting for the exquisite ammonite that showcases a fossilized multi-chambered design with warm golden shades. Visually balanced by the circular base, the long stem is topped with a conical bobèche with a wide rim. Please note that the ammonite's colors may vary from those in the picture due to its organic nature.
