AMPOLLA VASE

\$420

DESCRIPTION

This ampoule-shaped vase with handle was crafted by hand of "riverberata" maiolica and features abstract hand-applied patterns that grace its surface throughout. Its main decoration is a geometric motif that mixes waves and diamond with details in gold and ruby red on a white background. The standout feature of this exquisite piece is the metal quality of its "lustro", the lusterware obtained with a third firing in a wood-burning kiln. This one-of-a-kind object will add a superb decorative accent in any interior.
