ANDO COSMOS RED CRYSTAL SCULPTURE BY TADAO ANDO

\$39,000

DESCRIPTION

Designed by Tadao Ando, this exceptional blown-glass sculpture features two square planes in amber and orange meeting at a right angle and revealing a half-sphere seemingly emerging from the intersection. The piece uses two different glassmaking techniques ("battuto" and "applicazione a caldo"), resulting in a smooth and rough surface. It is part of a limited edition series of 30 pieces made by the artist.
