ARAB CABINET

\$8,195

DESCRIPTION

Reminiscent of Bauhaus furniture, the sleek lines and bold forms of this striking cabinet will bring a sophisticated accent to a modern living room. This cabinet has a trapezoidal base made of ash that supports a structure of alternating planks of wengè and maple with a distinctive, ridged surface. This elegant juxtaposition of forms and textures highlights a dynamic visual quality. The cabinet doors have a small, central square cut-out that serves as a door handle, while also slightly revealing the contents of the cabinet's shelves. This piece will shine in a minimalist decor.
