ARLECCHINO MEDICI VASE

\$580

DESCRIPTION

This superb vase is part of the Arlecchino collection, whose mouth-blown colorful glass pieces are inspired by the Venetian carnival mask of the same name and its multi-colored clothes. In this case, the hand-applied, pastel-colored hues grace the gentle curves of this classic silhouette that was inspired by a vase that is part of the Medici collection at the Uffizi Museum in Florence. Classic influences, exquisite craftsmanship, and the precious accents of pure gold details make this piece a magnificent object of functional decor.
