ARTEMISIA ROLLERBALL PEN IN PADOUK WOOD

\$260

DESCRIPTION

This striking rollerball pen features a practical magnetic cap and it is in bubinga, a coral-red wood from West Africa, Angola and Nigeria. This wood is highly resistant and, with time, acquires vivid dark-orange shades. The cap is in chromed metal with a magnetic mechanism. The same metal highlights the body of the pen and can also be customized with hand-engravings. Because of the unique nature of the wood, and because this pen is handmade, each piece can slightly vary from the photo.
