BALLERINA GREEN SCULPTURE

\$310

DESCRIPTION

Part of the Ballerina collection, this sculpture is inspired by Fortunato Depero's painting *Ballerina Negra*. It was crafted of clay that was poured into a gypsum mold reproducing the likeness of this dynamic dancer in a three-dimensional way. The white color alternates with delicate green in this object that was fired twice and was added a glass finish at the end. A striking complement to a modern and eclectic home, this piece will also make a unique gift.
