## BASILEA MAPLE AND BEECHWOOD BOOKCASE BY PAOLO CAPPELLO

\$33,920

### DESCRIPTION

Designed by Paolo Cappello, this modular bookcase is a modern and sophisticated homage to the fractal structure. It harmoniously combines modules all 120 cm long to create endless combinations of open compartments to display and hold a variety of objects, depending on the use. Each bookcase is customizable and different elements can be added for any decor need. In this case, the glossy-finished brass structure supports shelves in maple and beechwood, with the addition of a closed module (120 x 35 x H43 cm) and a round mirror (42.5 x 1.6 x H64.5 cm.)
