BATTUTO LARGE GREEN VASE

\$2,690

DESCRIPTION

Stunning in its simplicity, this exquisite forest-green vase will be the lavish focal point of a dining room table, entryway console, or bay windowsill.

Distinguished for its dynamic texture, this vase is made of blown glass in the "Battuto" technique, a method which uses a grinding wheel to create distinctive irregular "round" stamps on the cooling glass, to give the appearance of wrought iron. These details, intensified by the vase's cylindrical silhouette and vibrant green color, create visual harmony and textural balance.
