CHAMELEON CERAMIC PLATE

\$1,040

DESCRIPTION

This incredible sculptural plate features at its center a dramatic chameleon eating a bee. Befittingly, all the colors merge into a beautiful green palette. Other animals from the pond scurry around the border: a grasshopper, a beetle, a lizard and a slug. The amazing glazes and the remarkable fresh style of the craftsmanship awaken a sense of childlike wonder. Small cracks and chips are part of the antique feel of this artwork and are not considered defects.
