CRAB CERAMIC PLATE

\$1,040

DESCRIPTION

A dramatic oversize crab dominates this sparse seascape. The delightfully detailed shell and the lifelike animation of the modeling make this a must for sea lovers everywhere. Three small mollusks and a couple of shells perch on the border as if they washed up on the shore. The simple color contrasts make this an ideal piece for hanging on the wall. Small cracks and chips are part of the antique feel of this artwork and are not to be considered defects.
