Lorenzo Maria Monti

BIG BANG PHOTOGRAPH

\$4,690

DESCRIPTION

A powerful explosion of warm and cold colors and particles reminiscent of water drops, this splendid photograph is an abstract interpretation of the magnificent event of the Big Bang. Part of the Vitrum Spatialis project exhibited at the Biennale Arte of Venice in 2019, it is developed using traditional methods, and then printed using high-tech on Fuji Crystal Pearl HD paper. It is also covered with shatter-proof Plexiglas (2mm-thick) for protection and fixed on an aluminum Dibond frame (1mm-thick, profile 0.5cm) for durable stability. A Slimline frame is available upon request.
