BIG BOY COFFEE TABLE

\$3,160

DESCRIPTION

A factory-chic update on a classic living room staple, this industrial-style coffee table features a striking iron base inspired by the design of the running gears of steam locomotives with a square glass top with rounded corners. The name of the collection comes from the words written by a worker of the ALCo (American Locomotive Company) on the smoke chamber of the largest steam railway locomotive ever built, here reproduced on a round plate on one side of the base. The mix of metal and glass creates a sleek, contemporary look that will stand out in any interior.
