**BIG COLLINA EXTRACOLOR XL BLUE CENTERPIECE**

\$730

## DESCRIPTION

A striking addition to a contemporary home, this centerpiece was designed by Gaetano Pesce in 1995 as part of the Fish Design collection. Either displayed alone or with the other items from the same series, this striking and versatile piece will make a statement in an entryway, dining room, or living room. The base in deep red supports a layered bowl that opens up into a large mouth. The irregular edges of the piece, entirely made of soft resin, seem to stop the crafting process in time, creating a visually stunning effect.
