JEAN STACKABLE TABLES

\$5,620

DESCRIPTION

Inspired by the organic forms of Hans Arp's abstract compositions, these tables are defined by wavy lines that evoke the shapes of plants and other natural motifs. The tops are made of wood with a lacquered finish and each leg is composed of two brass cylinders that create an alluring contrast. Showcased at Salone del Mobile during 2018 Milan Design Week, these tables are entirely stackable, and can be displayed separately or arranged to create an original conformation that will add a playful touch to a modern living room or office decor.
