### BLOWN GLASS COLUMN VASE

\$440

#### DESCRIPTION

This beautiful vase, hand blown following the traditional glass blowing technique of Murano, pays homage to one of the fundamentals of ancient Italian and Western symbolism: the column in the Doric order. The vase depicts the column with its essential traits: the absence of a pedestal, the shallow flutes on the shaft, and the capital, free from ornaments. The silhouette has been softened by grooves running naturally towards the top, adding fluidity to the design.
