BLUE CORAL LAMP

\$2,545

DESCRIPTION

This marvelous lamp featuring a body in natural blue coral elevated by a simple hand-crafted nickel plated brass base is a one-of-a-kind piece because each coral is unique in its size and shape. This coral comes from the Indo-Pacific ocean and once it has been cleaned of algae, a bright blue coloration is revealed. The surface of the coral is covered in small polyps, creating a "furry" appearance, ranging from blue or gray-greenish or from gray-blue to light blue. The dimensions of the base can be customized according to the needs of the customer. The sophisticated rectangular lamp shade is in a creamy white color.
