BOW BLACK AND GRAY RUG

\$7,910

DESCRIPTION

Suggestive of Fernand Leger's abstract paintings, this exceptional rug exudes allure and elegance. Made in India, the piece showcases a stunning, three-dimensional geometric design formed with alternating rows of large dark- and light-gray squares and smaller, beveled black squares. Expertly rendered on a black background, hand-knotted wool and bamboo fibers create a seamless design. The color contrasts and shape combinations produce a textured, dynamic quality that enhances the graphic sophistication of the composition. Customization available upon request.
