Stories Of Italy

BRAMANTE GREEN GUATEMALA MARBLE TRAY

\$670

DESCRIPTION

Cut and sculpted by hand in Carrara. Marble is among the materials most associate with Italian art for it was favoured by the greatest architects and sculptors throughout history. The circular shape invokes the Renaissance concept of the man as the centre of space and nature. The fusion of these two elements "material and shape" in the trays has created a look that is bare yet grand. These classical references give therefore life to a modern beauty. These green trays have been handmade in the city of Carrara - the capital of sculpture - where Michelangelo went in search for marble blocks from which his illustrious artwork have been carved.
