CALABAZA BOTTLE WITH LID

\$130

DESCRIPTION

The geometric silhouette of this bottle combines architectural design and dramatic flair to give the piece a striking appearance. Either used on a dining table or as a sculptural piece in an entryway or a living room, this bottle will make an elegant statement, thanks to its sinuous frame made up of three spheres. The top smooth one is the lid and rests on the other two spheres, which are both strikingly adorned with a wave-like pattern of parallel curves.
