CASQUETS DINNER PLATE N. 12

\$110

DESCRIPTION

Part of a series of elegant tableware introduced at the Maison&Objet 2019 in Paris, this superb dinner plate is crafted of porcelain. The gleaming surface is adorned with two concentric garlands of triangles in black and white, with four details in gold to match the luxurious gold rim marking the edge of the piece. The center of the plate has a detail of an antique print that depicts the top of the Casquets lighthouse surrounded by clouds dancing in the white sky. This superb piece can be combined with the others in the same Casquets Collection to create a rare effect.
