CASQUETS DINNER PLATE N. 4

\$110

DESCRIPTION

This stunning dinner plate is part of the Casquets Collection, introduced at Maison&Objet 2019 in Paris. Evocative and mysterious, each plate is a window on a curious and sophisticated scene, a detail taken from a vintage black and white print, here depicting a dynamic scene of wild waves observed by a crowd of people standing by the Casquets lighthouse. A garland of small and large triangles creates a stunning frame accented in gold similar to the rim around the detail. For a superb final effect, it is possible to combine different designs in the same series, both for dinner and dessert.
