CENTRO TABLE

\$1,470

DESCRIPTION

Omri Revesz and Damian Tatangelo designed this table that was entirely handmade. Its design is based around the idea of meeting. Its four metal legs join below the top, forming four arches that converge to a single point in the heart of the piece. The curves of the structure elegantly complement the straight lines of the top, making it a timeless piece of furniture that can be placed in any decor and any room in the house.
