**CESTINI VASE-BASKET #3 BY ANDREA BRANZI**

\$740

## DESCRIPTION

Introduced at Milan Design Week 2018 and crafted of brass, this exquisite vase-basket was designed by Andrea Branzi and evokes, in a contemporary way, the ethereal circle of life celebrated by the sacred rituals of ancient tribal traditions. The cylindrical shape of the piece is adorned with cutout silhouettes of different sizes, depicted in dynamic poses as they dance. Either as a container for a vase or a stunning decorative piece, this object will make a statement in a contemporary home, either alone or combined with the other bowls in the same series.
