CHESS LOW TABLE

\$14,160

DESCRIPTION

Clean lines of the structure in polished brass and extractable, octagonal forms that make this table unique. With Chess is possible to create different patterns of the table top thanks to the extractable octagonal forms which are all black on one side and black and white on the other side. The polished brass is intended to patina over time and creates a graceful character. Upon request the structure is also available in polished lacquered brass (no patina) or in brushed brass.
