Falegnameria Salvatore Spano

CHROMA CHEST OF DRAWERS

\$4,250

DESCRIPTION

A striking use of color and form, this stunning chest of four drawers is handcrafted of seven layers of tanganyika wood finished with a water-based yellow varnish. The top and the front panels of the drawers are a striking combination of different slats of salvaged solid woods with a 45-degree angle that connects the top with the first drawer to create an invisible joint. The drawers open laterally to create a sleek front. The durmast bottom and legs (20 cm height) are mounted on a steel plate. Each piece is unique and can be customized in measurements and colors, please ask the Concierge.
