CICCHETTO NR 4 PLACEMAT

\$255

DESCRIPTION

Part of the Cicchetto collection, inspired by the Venetian Gothic architecture with its elongated arches and the Moorish influences, especially in the stunning windows of Palazzo del Doge facing Piazza San Marco, this placemat is a unique and elegant addition to any home. It was crafted of copper and features a series of alternating architectural details that create a stylish abstract pattern that is both sophisticated and mesmerizing. This is one of four designs from this series that can be combined together to add dynamism to both a formal seated dinner and a chic pool party.
