CITRINE TABLE LAMP WITH BLACK SHADE

\$2,610

DESCRIPTION

This table lamp doubles both as a functional home accessory and as a decorative sculptural piece that will enhance the decor of any room in the house. The body of this lamp was crafted using a large piece of hand-cut thermo diffuse citrine from Madagascar, which is mounted onto a nickel-plated brass base that strikingly contrasts with the natural stone. This material is known as the stone of success. The minimalist structure bares a delicate design which does not compete with the stone. The black shade allows light to reflect into the citrine creating a striking effect.
