COBALT BLUE VASE #4

\$480

DESCRIPTION

Characterized by a tall, cylindrical shape and a distinctive pattern, this superb porcelain vase will enliven any room in a modern or coastal-inspired decor. Simple yet unique, this vase was crafted using the hand-building slab technique, whereby a large rectangular slab is placed over poured color pigments that incorporate into the material, creating a uniform texture. The slab is then wrapped in a large cylindrical mold achieving its final shape. The glossy finish complements the bold pattern with gold circles and a cobalt-blue brushed accent, standing out on the pure white background.
