## COBRA ACCIAIO BOOKCASE

\$23,600

### DESCRIPTION

This design bookcase encapsulates its artistic value and presents the Cobra, a sculpture made by hand by combining different sculptural and decorative techniques. The internal structure is in stratified wood which is glued, shaped, and sculpted, then entirely covered with a black film. The intrinsic value of each Cobra sculpture is its uniqueness. The edges of the back are detached from the wall to give it an aerial, floating effect. Led backlighting kit not included. Designed by Gianni Arosio.
