COLONNA CARRARA CANDLE HOLDER

\$685

DESCRIPTION

Part of the Rovinette collection, this candle holder recreates the romantic look of a classical ruin, interpreted through a contemporary aesthetic that makes it a sculptural decoration, equally stunning in a traditional or modern home. This elegant object was turned from a solid piece of precious Carrara marble and finished by hand for this exquisite effect that mimics the asymmetric structure of a fallen Roman temple. This unique object of functional decor can be displayed with identical ones in an entryway or dining room, or with the Colonna Guatemala Candle Holder for a dynamic effect.
