COLONNA GUATEMALA CANDLE HOLDER

\$520

DESCRIPTION

Poetically evoking the elegance and romantic allure of the classical ruins of ancient Rome, this candle holder will make a statement in both traditional and modern homes. It was turned of a solid piece of green Guatemala marble and shaped by hand to recreate a single column ("colonna" in Italian) that was diagonally cut at the top to reveal the hole for a candle. A one-of-a-kind addition to an entryway, living room or dining room, this piece will look equally stunning alone or paired with the Colonna Carrara Candle Holder.
