Daniela Proietti

CORALLI SCULPTURE

\$590

DESCRIPTION

Craftsmanship takes center stage in this remarkable ceramic sculpture inspired by the sea, that represents a birdsnest coral with its distinctive, thin branches ending in tapered tips. The uneven rim of the blue bowl evokes the image of a sea bed where masterfully coiled branches in vivid red are held by cylindrical supports inside the piece. The removable red branches are painted with cold enamel (not fired in a kiln) and can be positioned in the desired arrangement. This is a one-of-a-kind piece to proudly showcase in a modern or traditional interior decor.
