CORALLI STRIPS-O TABLE LAMP

\$4,490

DESCRIPTION

Ceramic coral clusters glow on the top of jewel-toned amphorae, straight from the depths of a dreamlike ocean. Like living jewels plucked from the depths of the Ocean, coral branches took center-stage in the Wunderkammers of centuries past: those cabinets that sovereigns and nobles used to fill with antiques and exotic curiosities. Now as then, with its animal nature, arborescent shape, and stone-like texture, coral and LED technology capture perfectly a sense of wonder and enchantment.
