CORDOBA CEILING LAMP BY DANIEL LIBESKIND

\$5,500

DESCRIPTION

Designed by Daniel Libeskind, this unique ceiling lamp is crafted using engineered plastic, a more resistant type of plastic that can be shaped in complex ways: the stunning silhouette, with its asymmetrical outline, appears to be made up of disconnected fragments. This elegant piece was inspired by the mystical ambiance of the city in Spain that gives it its name. Each element of the piece was created following an algorithm designed to harmoniously diffuse light. Assembled by hand, this lamp will have a different silhouette depending on the point of view.
