CRAB TALL CABINET

\$10,100

DESCRIPTION

A tribute to the Italian design of the 1950s, the Crab collection is characterized by pieces with a unique supporting structure that can be rotated to change the height of the cabinet (in this case from 162 to 171.5 cm). Entirely handcrafted of solid wood, this tall cabinet features a satin-finished drawer that separates the two 2-door units: the larger on top has smooth panels with soft-closing hinges while the bottom has smaller recessed panels. Shown at Salone del Mobile 2018, this piece is the ideal choice in any living or dining room to add storage without compromising quality and style.
