**CRODES NIGHTSTAND**

\$645

## DESCRIPTION

This stunning nightstand is created by the union of two contrasting natural materials: wood and glass. The smooth, cold surface of the glass top, which seems to float, contrasts with the distressed, warm-colored surface of the two beams forming the support for this unconventional piece. The wood comes from beams and planks of old barns and is coated with natural beeswax to enhance its natural, distressed features and high-contrast grain. A one-of-a-kind design that will make a statement in any decor.
