DOMINO ECOLOGICAL SOFA BY DAVIDE BARZAGHI

\$14,325

DESCRIPTION

This exclusive sofa will be the focal point in any modern living room with its elegant lines and versatility. The four modules are built on an ash plywood frame padded with vegetable natural oil, officinal herbs, and goose feathers and assembled in a square shape.

Upholstered in white cotton fabric, three modules have a blue corner detail, the same color recurring in the cushions of the backrest and single armrest. The Domino modular system allows total customization as the seats can be revolved, moved and split, creating new compositions such as linear sofa, L-shaped corner unit, and daybed.
