## DON CHISCIOTTE SET OF SIX PLATES #5

\$550

### DESCRIPTION

An unconventional union of ceramics and literature, this exceptional plate will be a lovely gift for an art or classics lover. Inspired by the tales of Don Quixote, this plate boasts a silhouette of the legendary protagonist riding a steed as he and his companion Sancho Panza wander through a verdant landscape. A deft use of colors and voids, the fluid brushstrokes in the sky and terrain and the scratchy texture of the figures contrast to create a singular piece of functional decor. It is possible to customize the set by choosing a different motif for each plate.
