DOPPIASVOLTA DINING TABLE BY MARIO BELLINI

\$8,860

DESCRIPTION

Designed by Mario Bellini in 1994, in this remarkable single-material table, the geometric lines and noble material create a decorative and functional piece. The structure features an oval top supported by a base made of a solid marble piece shaped like a double pivot. Detail, luxury and art are the key elements that turn this table into something truly unique. The oval shape makes this elegant table appropriate for a dining area or as a statement piece in a contemporary office space. Available in travertine, white Carrara, or "Rosso Magno" red marble (as seen in the picture), please ask the concierge about pricing for these options.
