EGG EARRINGS

\$580

DESCRIPTION

Unconventional aesthetic and understated elegance characterize this sophisticated pair of earrings. From the Nest Collection, these earrings are inspired by the paintings of Renaissance artist Piero della Francesca, their egg-shape representing the balance between life and death, new beginnings, and revitalization. Masterfully crafted of 925 silver, their smooth surface and egg-shaped silhouette are enhanced by the glossy finish, which will catch the light in a multitude of reflections.
