EQUILIBRIO FLOOR LAMP WITH SERVOLUCE

\$590

DESCRIPTION

A minimalist objet d'art that functions as a floor lamp, this inventive design is composed of two symmetrical tubes (one of which is the light source) seemingly floating in mid-air thanks to a magnetic force that holds them together. Around them is fixed a light holder accessory called "Servoluce", which helps directing the light in flexible and adjustable positions. Two types of Servoluce are available, floor and wall, both in a black finish. Recommended height: 165 cm from the floor, and 350 cm from the ceiling. Contact the Concierge for any additional information. To install the lamp, it is necessary to mount a fischer plug on the ceiling (no wiring is needed from the ceiling). The standard product can be installed in rooms having a maximum height of 3 m. The length of the cable is customizable.
