EYE LAB SCULPTURE

\$180

DESCRIPTION

Eyes are indeed the windows to the soul in this sculpture inspired by vision and the human eye. Crafted entirely of aluminum, the two separate pieces have rounded, eye-shaped silhouettes with tear ducts, carved iris, and drilled pupils. This objet d'art analyzes the complexity of sight as the instrument that allows humans to interpret light, capturing the simple yet complex workings of the eye. Showcased as a centerpiece on a patio table or entryway console, this unconventional sculpture will enrich any decor with its alluring gaze.
