FLOWERS EARRINGS IN TITANIUM, SILVER AND PEARLS IN FUCHSIA

\$620

DESCRIPTION

These delicate earrings were crafted using artisanal methods and their charming flower-like body is made in .925 silver and titanium. Inside each flower there is a 4.5 mm diameter pearl, that can be used alone by removing the outer part. The titanium present in the flower-shaped element is oxidized, not varnished, and this allows it to remain hypoallergenic. Its color can be chosen among other options. The back is in silver with the MB logo laser-engraved on it. The pair comes in a case and with a certificate of authenticity.
